

SCOTT KISSINGER

Senior Python / Django Engineer

Product-Focused • Systems-Oriented • High Ownership

Florida, USA (Remote OK)

GitHub: <https://github.com/blindedbythemoves>

Email: scottkissinger@yahoo.com

PROFESSIONAL SUMMARY

Senior software engineer specializing in Python and Django with extensive experience designing, building, and maintaining production-grade applications. Proven ability to own systems end-to-end, including architecture, data modeling, background processing, API integrations, and performance optimization. Former product and operations executive who transitioned back to hands-on engineering, bringing strong systems thinking, disciplined execution, and rapid development velocity to software teams.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frameworks: Django, Django REST Framework

Frontend: HTML, CSS, Bootstrap, Vanilla JavaScript

Databases: PostgreSQL, MySQL, Redis

Infrastructure & Tools: Celery, Redis, Stripe API, GitHub

Concepts: API integration, data ingestion pipelines, async/background processing, system design, performance tuning

SELECTED SOFTWARE PROJECTS

traderBot2 — Automated Trading Platform

- Designed and implemented a Django-based automated trading system integrating Interactive Brokers APIs

- Built real-time and historical market data ingestion pipelines using Celery and Redis
 - Implemented strategy execution logic, trade lifecycle tracking, and performance analytics dashboards
 - Emphasized reliability, idempotency, and defensive error handling in live-trading conditions
-

harpoonchess — Large-Scale Chess Analytics Platform

- Built a high-volume analytics system ingesting millions of chess games from PGN files
 - Designed optimized database schemas and indexing strategies for analytical query performance
 - Implemented statistical opening explorers and move-frequency analysis tools
 - Focused on data modeling, ingestion performance, and query optimization
-

ArkHoot — Personal Finance & Budgeting Application

- Developed a full-stack Django application for personal finance tracking and budgeting
 - Implemented multi-account support, transaction categorization, reporting, and analytics
 - Designed domain-driven models emphasizing correctness, auditability, and extensibility
 - Balanced technical rigor with clean, user-focused workflows
-

Arkstead — Ecommerce Platform

- Built a Django-based ecommerce platform with Stripe payment processing
 - Implemented product catalog, checkout flow, order management, and fulfillment logic
 - Designed administrative tools for inventory tracking and order processing
 - Prioritized operational reliability and maintainable backend architecture
-

PROFESSIONAL EXPERIENCE

Independent Software Developer

2020 – Present

- Designed, built, and maintained multiple production-grade applications using Python and Django

- Owned the full development lifecycle: architecture, implementation, testing, deployment, and iteration
 - Worked extensively with background workers, data ingestion pipelines, and third-party APIs
 - Focused on performance, correctness, and real-world usability
-

Professional Tennis Instructor (PTA Certified)

2022 – Present

- Provided private and group instruction, emphasizing structured skill development and client communication
-

Mathematics Teacher (Contract)

Lake Weir High School — Florida

2023 – 2024

- Taught Algebra and Geometry to high-school students
-

EARLIER CAREER (CONDENSED)

Vice President of Business Operations — Coast Dental

2011 – 2020

- Led multi-department operations supporting 170 dental offices nationwide
 - Oversaw technology initiatives, process improvements, and operational scaling
-

EDUCATION

Master of Business Administration (MBA) — University of Florida

Bachelor of Science, Electrical Engineering — The George Washington University
