PROFESSIONAL PROFILE

I am an accomplished dental and medical industry professional and leader for medical and dental companies. In the past I have led a \$240-million vital sign monitoring company and a \$170-million dental service organization. Expert in physician engagement and recruiting, business development and expansion, operational management, project management and business process management and improvement. Highly adept at multi-tasking and leading a large team to success. I am a highly valued team member that has been regularly promoted to positions of higher authority and responsibilities. Regarded as a motivated self-starter that adapts well to change and works well under pressure. I am a polished communicator who can easily build influence, consensus, and rapport across a multitude of disciplines, organizational hierarchies, and professionals of all levels. If I have sent you my resume, then I am worth an interview with your company!

PROFESSIONAL EXPERIENCE

COAST DENTAL, TAMPA, FLORIDA

2011 – PRESENT

Vice President of Business Operations

- Lead various Support and Operational departments for management and support of 170 dental offices and 1,500 employees across the country
- Created technology and strategy roadmaps for the company including:
 - Integrated new provider credentialing and ERP software to more rapidly ramp new providers to meet production goals
 - Spear-headed new employee orientation training to guide new doctors, hygienists and operational management on their duties and responsibilities and how to monitor and achieve their goals
 - Grew business by partnering with several financing providers such as CareCredit and Universal Guardian Financing to increase the number of financing programs and partners available to our patients
 - Build out new Learning Management Software platform to provide talent development and compliance training to all employees through easy to use online software
 - Established plan to upgrade 78 offices from film-based x-rays to digital x-ray processing for better diagnostic x-rays and quicker patient throughput
- Established operational budgets and approval workflows that improved P/L margins
- Implemented balanced scorecard performance management system for our District Managers
- Performed extensive requoting of vendor pricing to reduce supply costs
- Redesigned Learning Peer program, orientations and onboardings to improve company's training program.

Associate Vice President of Specialty

- Built-out Specialty operations (Orthodontic, Endodontic, Oral Surgery, Pedodontic and Periodontic) business line for Eastern U.S.A.
- Recruited and integrated specialist dentists into general practices
- Built dentist training program based on collaboration and learning peers
- Partnered with major dental product companies to create dental implant, clear aligner and endodontic training for general dentists
- Was the only regional operations manager out of 4 to consistently achieve production and P/L goals

Director of Purchasing and Product Development

- Managed procurement team that sourced dental supplies and equipment for 186 Coast Dental and SmileCare offices.
- Led projects to source and integrate digital radiography, digital impression scanning & on-site crown and bridge milling into dental offices.
- Achieved \$2.2 million in annual cost savings by standardizing product offerings, realigning vendors, and renegotiating supply and service agreements.
- Created and launched over 20 new private label dental products.
- Negotiated all supply and services vendor agreements
